JAMEL TONEY

I am a motivated developer, eager to generate and implement solutions for your business.

I am a self-motivated, very organized, outgoing and very capable of meeting deadlines, whether working independently or in a team.

With my skills, I will make it easy for your business to stand out and get the recognition it deserves.

Experience

05/2021 – Present

FREELANCER
UPWORK
- Created and deployed a shinobiinu contract for the platform token.
- Created a demo DApp for the shinobiinu token swap.
- Created an upgradable erc20 token contract using a call delegate proxy.
- Deployed the project to mainnet, verified on Etherscan, and provided instructions to the team on how to use it

07/2019 to 04/2021

Web & Mobile Developer
VANIDAY, Singapore
- Developed dynamic responsive eCommerce shop experiences
  - Developed front-end and back-end of Magento stores
  - Developed Magento extensions
- Worked on Vaniday Mobile app using React Native.
  - All screens built by reusable components. Pixel perfect from XD design and UI/UX user friendly and responsive.
  - Worked on several functionalities such as Add to Cart function, Payment gateway, push notification, Account Management, Order History Management, Pick up delivery method, Google Map SDK, etc.

Address

254 WOODBINE ST, BROOKLYN, NY 11221

Birthday

25 Febuary, 1987

Contact

Education

➢ **Carleton University**
2006 – 2010
Master of Library & Information Science - MLIS, Computer Software Engineering
➢ **Humber Colleage**
2011 – 2012
Bachelor of Engineering - BE, Information Technology
➢ **Lighthouse Labs**
2012 - 2013

- Used Redux, Redux-saga to connect Rest API and Unit test with Jest, firebase and deployed to App Store and Google Play Store

09/2016 to 05/2019

Frontend Web Developer
PLEASANT SOLUTIONS, Edmonton
- Developed smart contract to generate ERC20 token
- Working on development and implementation of Dapps projects in ethereum ecosystem
- NFT Games and Marketplace
  Smart contracts for NFT token, game, reward and liquidity using Solidity
  - Metaverse game development and generating NFT Arts about 10,000 images
  - NFT Minting platform
  - NFT Marketplace that provides buy, sell, auction and integrating with OpenSea
- Designed and Built backend REST APIs using Node.js and Express.js
- Created Responsive Design for web applications with Semantic UI, Bootstrap, and Flexbox
- Worked on React Native, Java, Kotlin, Objective-C, Swift for android and IOS.
- Implemented SQL injection security checks, HTML sanitization, and other security mechanisms.

05/2016 to 09/2016

Store Manager
QUANTUM MOB, Toronto
- Answered customer questions and resolved service issues in a timely manner.
- Diagnosed customer issues by asking probing questions and write up repair orders.
- Ordered supplies and kept inventory at optimal levels.
- Coordinated equipment repairs and maintenance.

02/2014 to 03/2016

Web Developer
JELLYFISH TECHNOLOGIES, Toronto
- Built an Invoice web application using React, Node and MongoDB that allows businesses to manage and send invoices for payment to clients that increased the revenue to 15% by optimizing the billing process.
- Reduced Completion of an invoice web application by two months creating 22 reusable components utilizing React Hooks, improving development efficiency and removing the need for duplicate code.
  Implemented React Router for navigation and fetching

Highlights

- Results-oriented
- Ability to motivate staff and maintain good relations
- Resistance to stress
- Good manners

dynamic Invoices data based on the URL parameters in an invoice management software.
- Utilized local storage to persist React application state and rehydrate Context API on site reload.
- Built custom React UI components using react hooks, and Axios for consuming REST API.
  Improved performance of an existing Ecommerce web application by 35%, mitigating prop drilling patterns by sharing data across multiple components utilizing Redux.
- Migrated a multi-page ecommerce website into a single page application with React which increased customer engagement by 10%.
- Developed REST APIs utilizing Node JS/ Express that served the Javascript front-end based on dynamically chosen user inputs that handled over 200 concurrent users.
- Developed user authentication feature utilizing Passport JS that allowed users to authenticate using their google account in an invoice management software by using the Passport JS strategies.
- Incorporated API Calls to an invoice web application and stored data efficiently in our MONGODB database.
- Delivered mobile-first responsive web design, cross-browser compatible and accessibility websites utilizing HTML CSS and Javascript, achieving 19% faster load time than industry average.
- Reduced completion of an ecommerce website by 1 month by creating a css library utilizing SASS improving the development speed.
- Produced stunning visual elements of web applications by translating UI/UX design wireframes into code while producing high quality, reusable markup using HTML5 and CSS3.

Skills

- ReactJs, React Native, AngularJS
- PHP(with MVC frame works)
  - Laravel, Yii, Zend
- JavaScript
  - Jquery, extJs
- NodeJS, Express,
- Python, Django
- WordPress, Magento, Durpal, Joomla
- Html, CSS, Html5
- Database
  - Oracle11g, MySql, MongoDB, Postgress, Database Design
- Git, GitHub
- C++, C#, Java
- PhoneGap

Work History

❖ 01/2020 to 2021/01

https://www.vaniday.com/

- Technologies: Magento 2, ReactNative, Laravel 8.

https://play.google.com/store/apps/details?id=com.vaniday.beauty.droid

https://apps.apple.com/us/app/vaniday/id978065950

one-stop beauty and wellness platform for beauty products and services

❖ *06/2021*

https://banana-nft-marketplace.vercel.app/

- Technologies: Solidity + React Frontend, Smart Contract Deploy

NFT Marketplat form.

❖ *05/2019*

https://ftmc-ards.vercel.app/
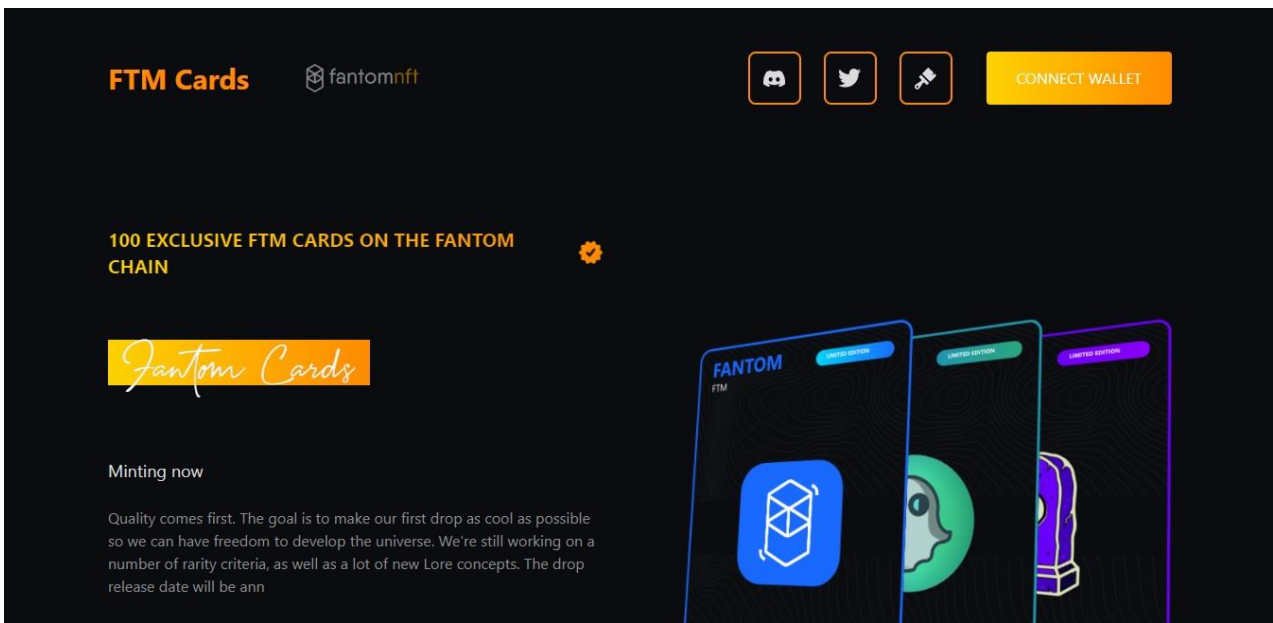

❖ *03/2019 to 12/2019*
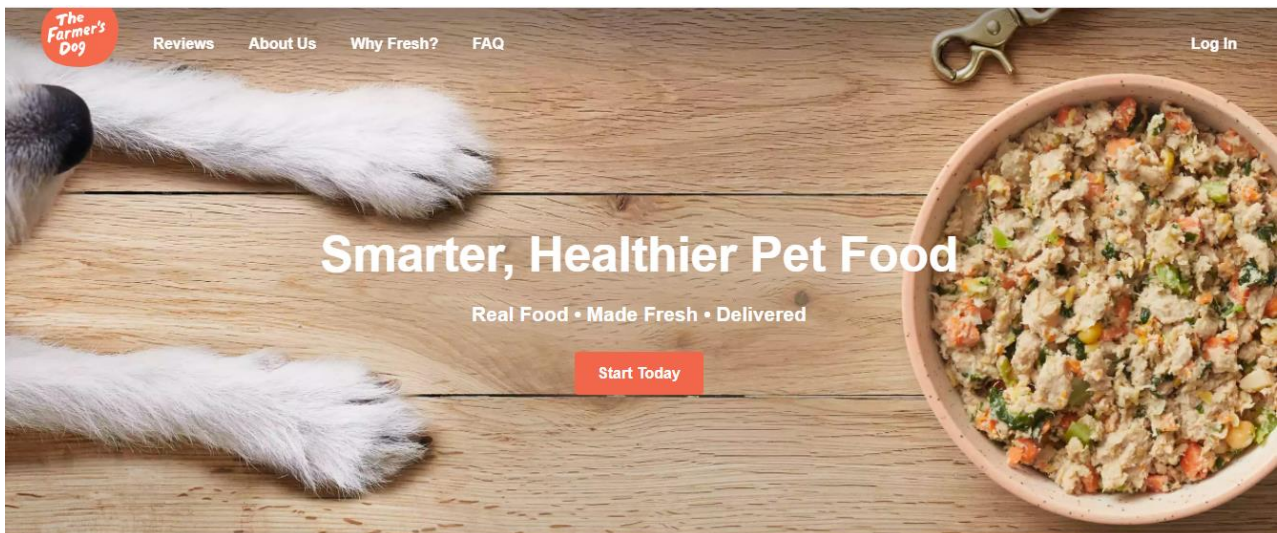

Get fresh food conveniently delivered with our personalized meal plans.

❖ *12/2018*
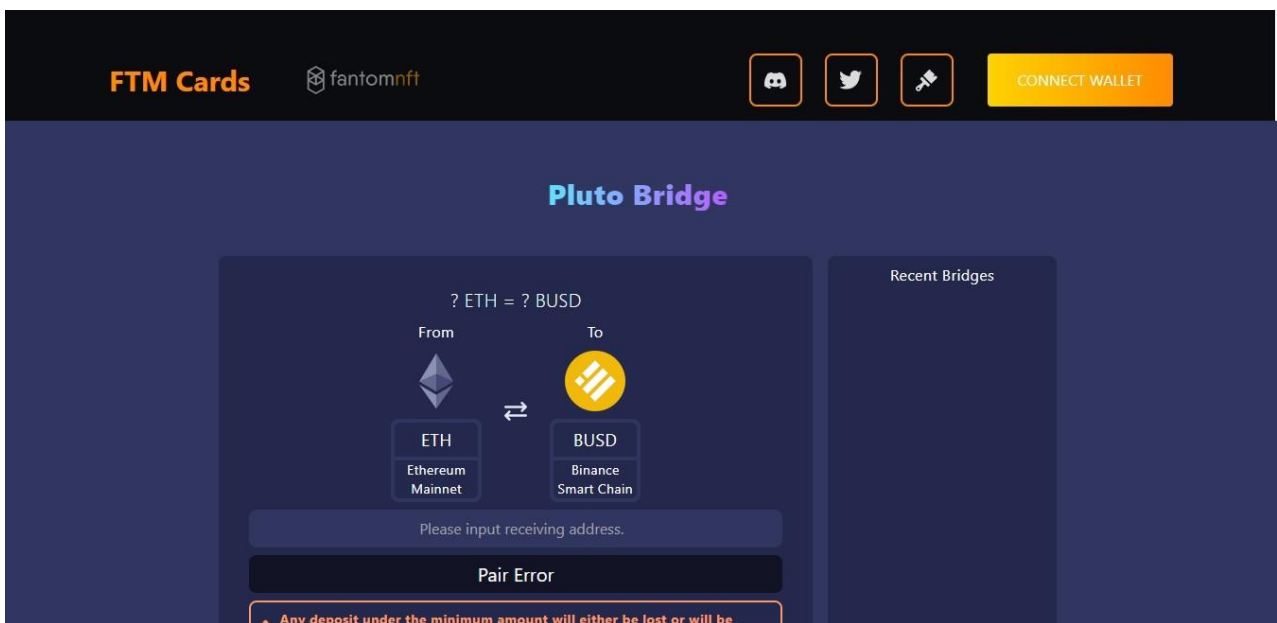

https://pluto-bridge.vercel.app/

- Technologies: Solidity + React Frontend, Smart Contract Deploy
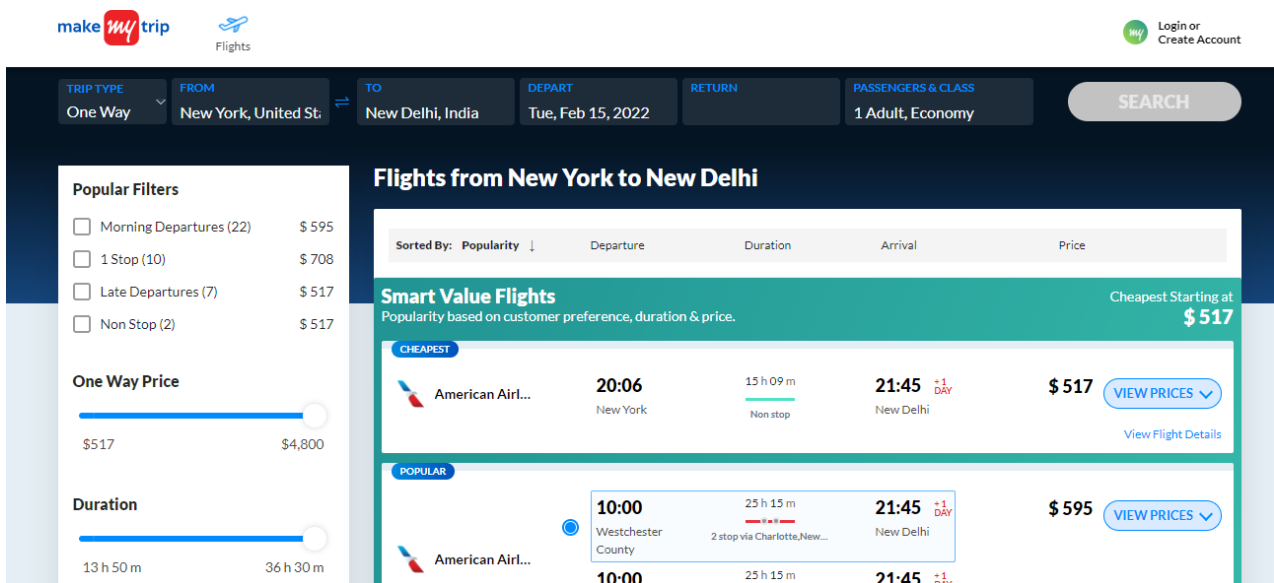

https://findgithubprofiles.netlify.app/

A react application utilizing the Github API to search for Github profiles. Created using HTML, CSS, and React.

❖ *08/2018*
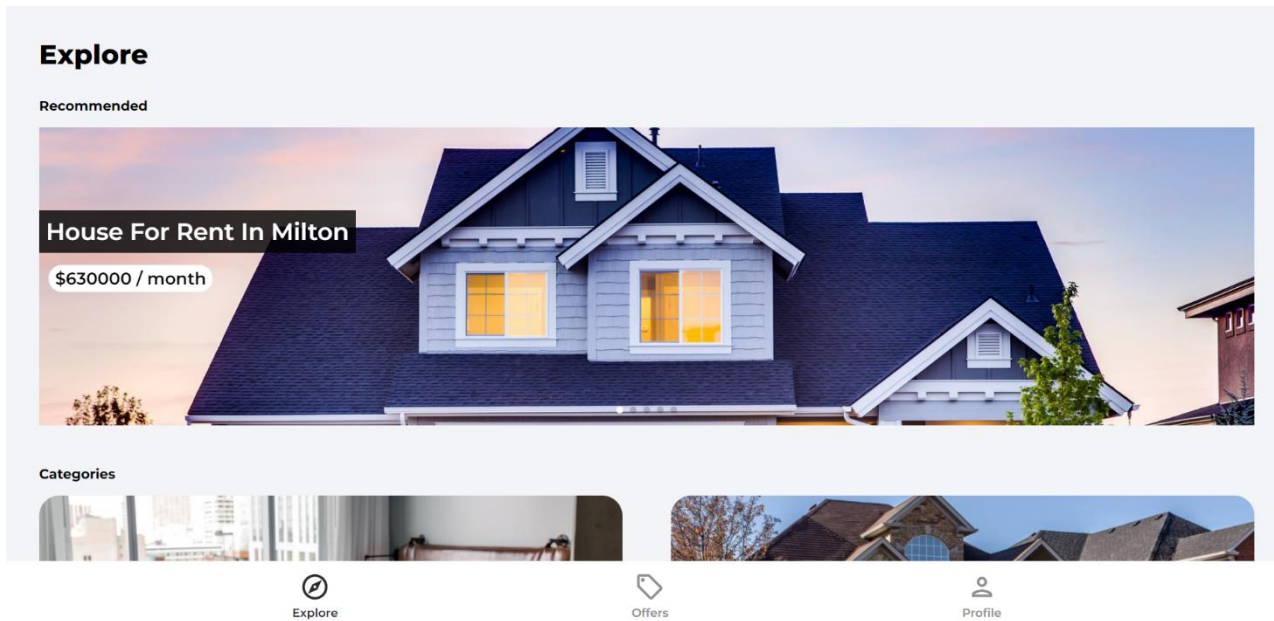

A marketplace for homes built with React and Firebase.

❖ *05/2018 to 09/2018*

Utilized React, Material UI, Uber API, Farefinder API, and Google Maps API which, allows users to be geolocated immediately and easily enter their destination, provide a comparison view of current rates across the different platforms and allow them to make an informed decision based on current fare estimates for their route.

❖ *01/2018*

https://healthyways.herokuapp.com/

Developed by react, node, mongodb, redux, razorpay, material-ui

❖ *01/2018 to 04/2018*

http://ivisitdoc.com/

- Details of the project: iVisitDoc.com merges cloud-based technology, operational support, and health care dedication into a versatile telemedicine solution, designed to go above and beyond the demands of traditional hospitals and health systems. For iVisitDoc.com we developed the telemedicine software system that allows doctors to consult patients in a video conferencing mode. The uniqueness of this software package is the possibility of

providing medical care to patients from remote regions where there are no doctors or specialists who do not have a certain specialization.

- Technologies: LAMP (Linux, Apache, MySQL, PHP7), OOP, MVC, GIT, SQL, HTML5, CSS, JavaScript, DOM, XML, SPA

❖ *10/2017 to 01/2018*

http://www.gannons.com.au
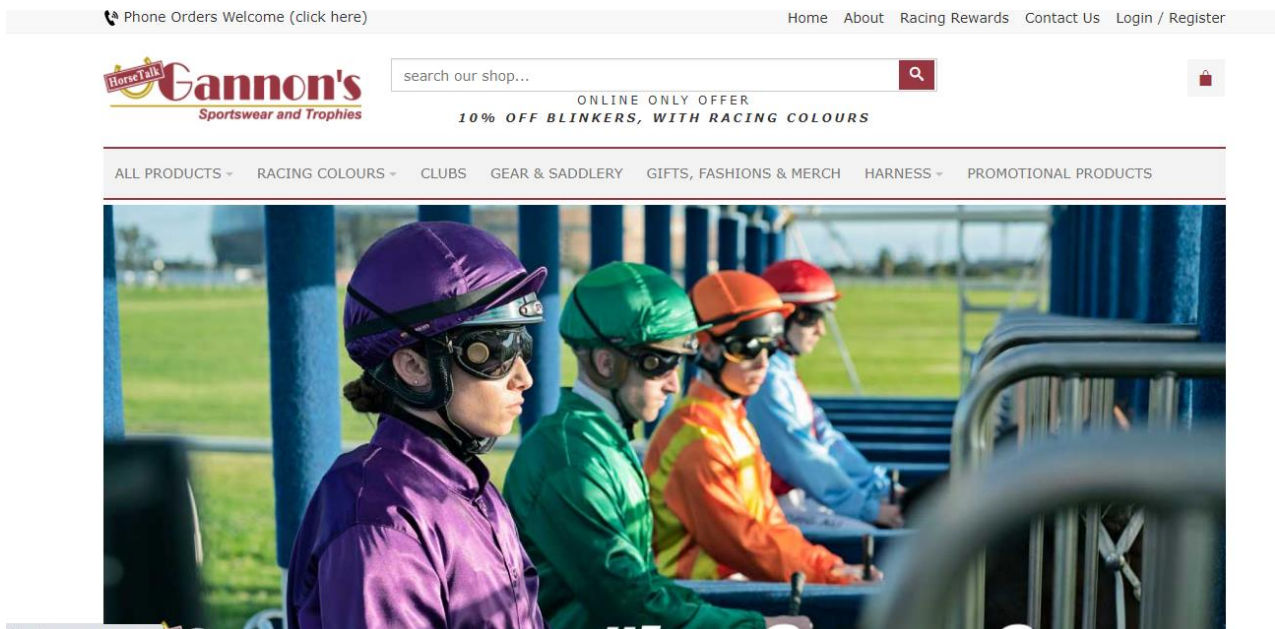

- Details of the project: For this client, we developed a custom plugin for Joomla/VirtueMart called "Racing Silk Generator". The plugin now appears on the client's website. We also developed a payment custom payment plugin for the processing of VISA and MasterCard's.

- Technologies: Joomla, LAMP (Linux, Apache, MySQL, PHP5), OOP, MVC, SVN, SQL, xHTML, CSS, JavaScript, DOM, XML, AJAX.
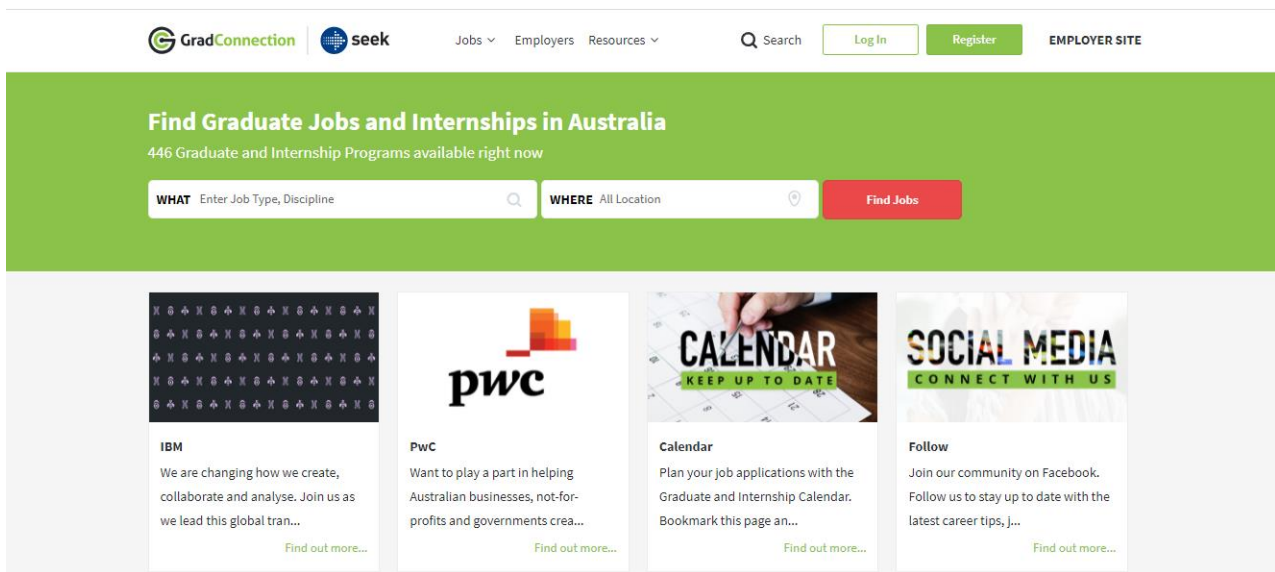

❖ *10/2017*

https://driwwwle.com/
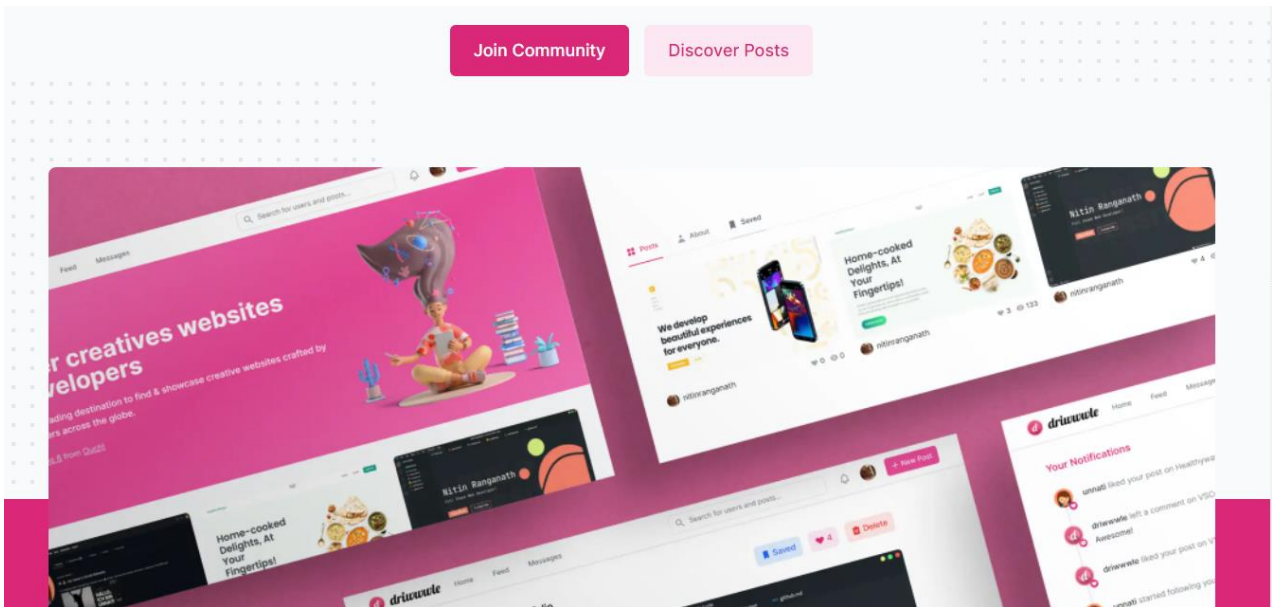

next, node, mongodb, tailwind, react-query

❖ *03/2016 to 03/2017*

https://au.gradconnection.com/

This job website was developed with Laravel 7.

I was worked as backend developer.
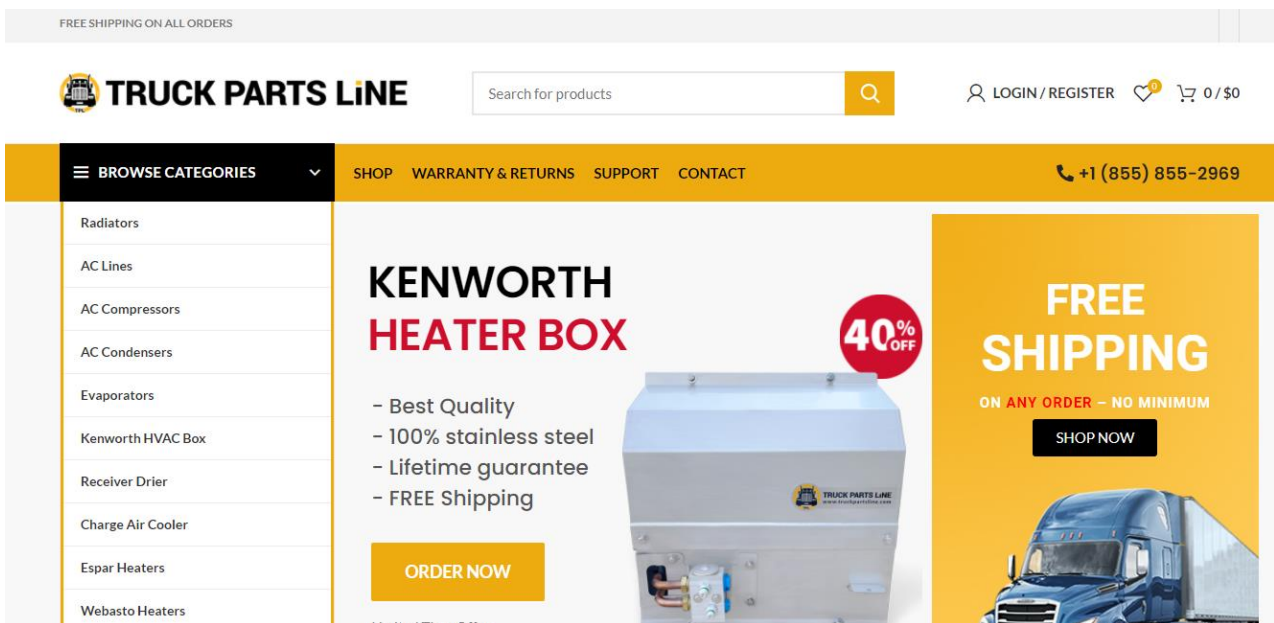

❖ *02/2015 to 01/2016*

This platform was developed by Mangento 2 and was peferformed with 4 members include 2 indian developers.

At that time, I was active as project manager for this shopping website.

https://greenngood.com/

❖ *04/2014 to 12/2014*

Delivering Reliable Truck Parts Service System.

https://truckpartsline.com/

This website was developed by using WordPress framework.

I have take charge of backend in this project.
